

Overview

Ashly Audio, an innovative and highly regarded manufacturer of professional audio equipment, is seeking a full-time engineering technician. Primary duties include electronic circuit validation testing, troubleshooting failures and issues to the component level, compliance qualification testing, prototype construction, and manufacturing quality assistance. If you have a passion for audio, then please let us know!

Responsibilities

- Perform circuit validation testing at all stages of the product design cycle.
- Troubleshoot the cause of electronic circuit problems to the component level.
- Document findings/defects and recommend solutions for product improvement.
- Develop test fixtures and programs for electronic circuit validation testing.
- Sustaining engineering duties such as screening and testing alternate components.
- Perform product safety and EMC compliance qualification tests and certification with third-party agencies.
- Help define and document test requirements and standards for new product technologies and features.
- Test and evaluate product control software applications.
- Other related duties as required.

Qualifications

- Bachelor's degree in Electrical Engineering Technology or related field, or equivalent knowledge and applied experience.
- Must be able to troubleshoot electronic circuits to determine the root cause of failure.
- Must be highly proficient with the use of electronic test equipment, analysis tools and software.
- Must be able to interpret technical specifications and establish methods to measure them.
- Must be a team player, willing to collaborate in a positive work environment.
- Must have excellent written and verbal communication skills.
- Experience with the use of professional AV products and a passion for audio quality are big pluses.
- Must be willing to travel on occasion to assist with agency compliance testing.

Location

Ashly Audio, Inc.
847 Holt Road, Webster, NY 14580
